The mechanism to address deviation is the formal staffing of a Request For Deviation (RFD) sent to PMO-LAV, utilizing the Multi-User ECP Automated Review System (MEARS) database. Upon receipt of the RFD, PMO-LAV will analyze the issue relative to cost, schedule, performance, and risk.

1.1 Background. Altered is defined as "maintenance technique, which determines the altered item in accordance with the Service Life Extension Program (SLEP) Technical Data Package (TDP). Rebuild is defined as "that maintenance technique which determines the repairs necessary to restore equipment components or assemblies to prescribed maintenance serviceability standards by utilizing all available diagnostic equipment and test procedures".
